

COBIT® Foundation Course v4.1

Fact Sheet

8 Hours | Self paced E-Learning | COB1010

The official ISACA COBIT Foundation course is an online, self-paced, interactive training course. Participants learn about the need for an IT control framework and how COBIT addresses this need by providing a globally accepted IT governance and control framework. The course explains the elements of the COBIT framework and supporting materials in a logical and example-driven approach for everyone interested in obtaining foundation-level knowledge of COBIT.

The course material is supported by practical exercises built around a virtual company. Candidates learn the true meaning of COBIT by practicing the use of COBIT in a safe, case-based scenario. An exam preparation module is included in the course, preparing participants for the COBIT Foundation exam.

COBIT is a registered trademark of ISACA.

COB1010 COBIT FOUNDATION COURSE

Course Description

The ISACA COBIT Foundation course helps IT, audit, risk, and compliance professionals master COBIT at a foundation level. The course explains the COBIT Framework using practical examples and a case-study-driven approach. It also addresses all other components of the COBIT toolkit, such as the Assurance Guide, Management Guidelines, and Control Objectives. In effect, the course helps professionals understand how to use COBIT in a logical and understandable manner and validates this knowledge through assessments and quizzes.

In addition, the course includes an exam preparation module that prepares participants for taking on the ISACA COBIT Foundation exam.

Prerequisites

There are no formal prerequisites for this course, but it is recommended that the participants have some experience in the IT governance domain.
